

The Economic Base of Hidalgo County, NM

**PREPARED BY: The Office of Policy Analysis at Arrowhead Center,
New Mexico State University**

DATE: July 2019

The Economic Base of Hidalgo County, New Mexico

Introduction

This report is one of 35 economic base studies prepared by the New Mexico State University's (NMSU) Arrowhead Center. Of the 35 reports, 33 describe the economic base of New Mexico's counties. There are separate reports for the State of New Mexico and for the Albuquerque Metropolitan Statistical Area (MSA). New Mexico has three additional MSAs (Las Cruces, Santa Fe, and Farmington) all of which are single county MSAs; separate reports for these MSAs were not prepared. All 35 reports may be found at <http://arrowheadcenter.nmsu.edu/economic-and-policy-studies/>.

The reports have been prepared under the direction of James Peach. Erin Sumner and Theophilus Djaba, graduate students in the NMSU Doctorate in Economic Development program, did much of the work on the updates. Comments and suggestions are welcome and are to be sent to jpeach@nmsu.edu. Our intent is to update these reports on an annual basis.

An economic base study is a descriptive tool used to analyze the composition of the local economic activity. Economic base studies are often conducted to help guide local economic development activities and to help economic development officials make decisions such as what type of firms they should attempt to attract to local areas. Economic base studies can also assist local and regional businesses to better understand local and export product markets.

The specific purposes of economic base studies include:

- Understand regional economic growth
- Make short and long term forecasts
- Identify potential growth sectors
- Identify potential problem areas

According to economic base theory, any local economy may be divided into basic and non-basic industries. The economic base theory also suggests that economic growth depends on sectors that export goods and services out of the region (basic industries), as opposed to those businesses whose services remain local (non-basic industries). Basic industries promote local economic growth by bringing jobs and income into the local economy. Non-basic industries serve local residents and provide support to basic industries.

An industry classified as basic in one region may be identified as non-basic in another region. One common means of identifying local basic activity is through the use of location quotients (LQs). LQs are calculated as a single industry's percent of total local employment divided by that industry's percent

of total state or national employment. For example, an LQ for a single New Mexico industry (industry j) may be calculated as follows:

$$\text{LQ} = \frac{(\text{Employment in industry j in NM} / \text{total employment in NM})}{(\text{Employment in industry j in US} / \text{total employment in US})}$$

The LQ serves to illustrate the relative importance in the level of the local employment of that sector with respect to the benchmark economy, as the state or national economy. A LQ greater than 1.0 indicates that a particular industry employs proportionately more workers locally than it does at the state or national level. Conversely, an LQ of less than 1.0 indicates that the industry of note employs fewer workers locally as compared to the state or national average. For additional information on LQs, see <http://arrowheadcenter.nmsu.edu/wp-content/uploads/2015/06/WhatisaLocationQuotient.pdf>.

In this report, LQs are calculated and analyzed for the industries within Hidalgo County with national employment as the basis for comparison (see Table 1). Additionally, LQs using employment for the state of New Mexico as the benchmark are included (see Table 2). For the purposes of this report, basic industries are identified using general knowledge about the structure of the local economy combined with LQs greater than 1.0. LQs are described for the most recent year for which data are available and the four years preceding (2013-2017). The economic data used in this report are from the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) which can be found at www.bea.gov.

Hidalgo County, New Mexico

Hidalgo County is located in southwestern New Mexico and encompasses 3,436.86 square miles or 2.83 percent of the land area in New Mexico. The population of Hidalgo County in 2017 was 4,305, or 0.21 percent of the state total, ranking 29th in the state in terms of population. Between 2013 and 2017 the population for Hidalgo County decreased by 6.80 percent. The City of Lordsburg, with a population of 2,464, accounted for 57.24 percent of the overall population of Hidalgo County (U.S Census Bureau, 2018). Between 2013 and 2017, New Mexico's population increased by 0.03 percent and the United States' population increased by 2.88 percent.

Figure 1. Per Capita Personal Income: Hidalgo (2017)

Per capita personal income for Hidalgo County in 2017 was \$37,255, ranking 16th in the state. Per capita income for Hidalgo County was 93.82 percent of the state’s per capita income (\$39,709) and 72.02 percent of the national average (\$51,731) (see Figure 1 and 2). Per capita income for Hidalgo County decreased by 1.81 percent. This percent growth is significantly lower compared to the state percent growth (13.21) and the national growth rate (15.34) for the same period.

Figure 2 : Per Capita Income of Hidalgo as a Percent of U.S. and New Mexico 2013-2017

Total employment in Hidalgo County in 2017 was 2,148. The county experienced a decrease of 2.01 percent in total employment between 2013 and 2017, compared to the increasing rate of 2.08 percent for the state and 7.57 percent for the nation. In 2017, Hidalgo County’s employment to

population ratio was 0.50, lower than the state (0.52) and lower than the nation (0.60). Given the small population and limited number of establishments in Hidalgo County, disaggregated data by industry for Hidalgo County released from BEA is very limited in order to protect confidentiality. Also, data for industries with fewer than 10 total employees are not publicly released. In both cases, industry data for both of are included in annual countywide totals.

In 2017, 61.50 percent of all workers in Hidalgo County were employed in the Private sector, while 29.56 percent were employed in Government and government enterprise, and 8.94 percent were employed in Farm employment. Within the private sector and from the data available, the industries with the highest percentage of total employment included Retail trade (13.04 percent), Transportation and Warehousing (3.17 percent), and Real Estate and Rental and Leasing (2.28). Additionally, Local government was the largest employer in the public sector accounting for 14.11 percent of total employment, while Federal/civilian employment accounted for 11.87 percent. State employment accounted for 3.07 percent and Military 0.51 percent. Employment for Hidalgo County by sector is displayed in Table 3.

Basic and Non-Basic Industries in Hidalgo County, New Mexico

Table 1 contains LQs for Hidalgo County from 2013 to 2017 calculated using data for the United States as the basis of comparison. Table 2 contains LQs for Hidalgo County from 2013 to 2017 calculated with respect to the state of New Mexico. From the available data and for the purposes of this report, an LQ greater than 1.0 with respect to U.S. employment is considered a basic industry. The sectors with an LQ greater than 1.0 have been shaded.

The great importance of Farm employment for Hidalgo County is reflected in the large LQ for this industry (6.66) and is considered a basic industry. The LQs for farm employment are greater than 6.10 in all years considered. The Private sector industries considered basic in 2017 are Mining (1.69) and Retail Trade (1.33). Utilities had a LQ of 1.24 in 2017 and will not be considered a basic industry in this analysis.

Government and government enterprises are the aggregate figure of all government levels listed as government categories. From the government sectors, Federal/civilian employment had an LQ of 8.15 and is considered a basic industry for Hidalgo County. This figure may represent the number of Border Patrol agents stationed in the county. State government (1.12) has been considered a basic industry in the past. Local government had an LQ of 1.94; however, local government is generally categorized as non-basic given that all local governments collect taxes from residents to provide for the

services to the community, including employment. Following this practice, local government for Hidalgo County is considered as a non-basic industry.

In brief, the data and analysis suggest that in 2017 the following industries should be considered basic industries in Hidalgo County:

1. Farm employment, accounted for 192 jobs.
2. Mining, accounted for 28 jobs.
3. Retail Trade, accounted for 280 jobs.
4. Federal civilian government accounted for 255 jobs.
5. State Government accounted for 66 jobs.

It is common in economic base studies to calculate an export-base employment multiplier. This employment multiplier is obtained by dividing total employment by total employment in the basic sectors. In the case of Hidalgo County, the multiplier is equal to 2.62 (2,148/821). This ratio suggests that the addition of each basic sector job in Hidalgo County would be associated with additional 2.62 non-basic sector jobs. The export base multiplier (2.62) calculated above reinforces the importance of basic (exporting) industries to the economy of Hidalgo County. In general terms, this employment multiplier is not to be compared to employment multipliers included in economic impact analysis tools including RIMS, REMI, and IMPLAN. In the case of Hidalgo County, potential double counting occupation may result in an upward bias of the multiplier given that farm proprietors often have more than one occupation.

Local economic development policy actions such as the creation of industrial parks, tax abatement and financing, and workforce development projects are often used by local communities to expand an area's economic base. The development of a community economic development plan is to include the appropriate combination of policies, which often result from public and private sector interaction.

Changes from Prior Year

This document has been revised to reflect data figures obtained from the BEA for the economic data and the U.S. Census Bureau for population data. Between 2016 and 2017, the population of Hidalgo County decreased by 0.58 percent, or 25 people. Per capita income increased by 1.58 percent

from 36,673 in 2016 to 37,255 in 2017. Total employment increased by 0.37 percent from 2016 to 2017, or a total of 8 jobs gained.
